

Phone Validation

Quickly capture, standardize, validate, and maintain accurate phone numbers for your customers

With over 5 billion mobile phone users worldwide today, it has never been more important to have accurate phone data for your customers and prospects. A valid and correctly formatted phone number enables streamlined customer onboarding as well as effective delivery of marketing and service communications.

That's where Experian comes in.

Experian Phone Validation is the fast, secure, and accurate way to validate phone number in real-time at the point of data entry. Our solution standardizes the format, adds international dialing codes, and processes data checks with telecommunication providers. These checks confirm if the number exists, is active and contactable and also returns valuable intelligence, such as the line type, network provider, country of origin, country code, disposable status, and ported date and status.

Coverage

- Coverage of 1500+ telecommunication providers in 240 countries and territories

Features

- Landline, mobile, VoIP, toll-free number identification for compliance
- Checks for number syntax, existence, network provider, porting status, and reachability
- Simple and actionable validation response codes
- Flexible deployment methods to suit any environment
- User portal to manage usage and tokens
- Purchase on a volume or annual enterprise basis
- 24/7 customer support globally

Phone Append Services

- Phone Append service that returns the phone number associated with the user's name and address
- Reverse Phone Append service that returns the user's name and address associated with the number

Landline only available in selected countries.

How it works

There are two ways to use this service:

Real-time validation at the point of collection

Capture, standardize, and validate phone numbers in real-time at the point of data entry. Whether you choose to integrate into your website, at a point of sale, or in a call center or CRM system, our API integrates seamlessly to protect your data quality without disrupting the user experience.

Service cleanse

Validate your phone lists on an ad-hoc basis depending on your need by submitting your data via a secure FTP site to Experian's Professional Services team. We will process your file and provide a summary of the overall health of your phone data as well as removing fake, incorrect or dead numbers from your lists

Benefits

Improve telemarketing and SMS marketing

Boost your SMS, location based and telemarketing campaigns and reduce wasted spend by ensuring calls and texts are only sent to valid phone numbers.

Enhance customer service

With valid phone numbers, you can provide a faster and more secure onboarding process, keep customers updated as part of their user journey, avoid delivery or appointment issues.

Reach your customers

Valid phone numbers enable you to communicate effectively with your customers at every stage of the sales cycle and ensure important messages reach the intended recipients.

Reduce fraud risk

Protect your organization by only capturing valid phone numbers and accessing valuable number intelligence for prospects and customers to help identify suspicious users.
